SKILLS

- Cybersecurity & Vulnerability Assessment
- Network Security & Communication Protocols
- Authentication & Access Control Analysis
- Security Testing & Technical Analysis
- Python Scripting & Automation
- Linux Systems
- Technical Reporting & Documentation
- Git & Version Control

CERTIFICATIONS

- Cisco CCNA
- CompTIA Network+

LANGUAGES

- English (Professional)
- Persian (Native)
- Italian (Basic – improving)

Computer Science MSc graduate with hands-on experience in cybersecurity testing, vulnerability assessment, authentication and access-control analysis, and Python automation. During my cybersecurity internship at Bluewind, I gained practical experience analyzing system behavior, identifying potential security weaknesses, and documenting technical findings. Strong networking foundation supported by CCNA and CompTIA Network+ certifications. Interested in developing further expertise in security monitoring, threat detection, incident response, and enterprise cybersecurity.

WORK EXPERIENCE

Bluewind Srl - Italy

OCT 2025 - APRIL 2026

Cybersecurity Intern (Automotive Systems)

- Performed vulnerability assessments and offensive security testing on embedded automotive systems focusing on CAN/CAN-FD and UDS protocols.
- Analyzed system behavior, authentication mechanisms, and access control processes
- Developed Python scripts for testing, validation, and basic automation
- Conducted robustness and stress testing to evaluate system reliability
- Documented technical findings and system behavior for analysis and reporting

PROJECTS

Managing Handovers for Drones through Cellular Networks (Course Project)

- Analyzed UAV connectivity, handovers, and communication reliability in cellular networks

Vialtaly - Public Transport Integration Platform (Course Project)

- Designed a platform integrating transport services with real-time tracking and route suggestions

EDUCATION

MSc Computer Science (2023 - September 2026)

University of Padova

BSc Computer Software Engineering
